

FOR IMMEDIATE RELEASE

PEKO Named in Top 10 Most Promising Contract Manufacturing Companies

ROCHESTER, NY (May 24, 2021) – PEKO Precision Products, Inc. was recently named among the [top 10 most promising contract manufacturing companies](#). Insights Success, a business magazine for enterprises across the globe, gave the honors.

The publication recognized PEKO for its ability to deliver complete customer satisfaction in terms of cost, quality, and delivery. Central to its commitment is a team of dedicated professionals who take the time to thoroughly understand the customers' products and needs – and who have the flexibility to adapt to changes.

PEKO backs its tailored solutions with full-service offerings to bring machinery products to market. These include:

- New Product Introduction
- Design Engineering
- Prototype Manufacturing
- Pilot and Pre-Production Manufacturing
- Production Manufacturing

After final assembly, they perform the last inspection or Factory Acceptance Test (FAT) to ensure ultimate quality leaving the plant. It is a quality management infrastructure that is second to none, according to PEKO's Marketing and Business Development Manager, Scott Baxter.

“A wide range of customer industries and profiles have helped us craft a strong and reputable Quality Management System (QMS),” says Jeremy Turcott, Quality Manager at PEKO. “Within the overarching QMS, each customer has a set of requirements that need to be addressed. The Quality team translates these from the customer and directly into our QMS. This puts Quality at the source, which profoundly reduces debug at final integration.”

With its focus on excellence in everything it does, the PEKO team is setting the bar high, with plans to grow on 10 percent YOY by building on successes in machinery and equipment manufacturing.

About PEKO: Founded in 1966, PEKO has grown from a precision tool fabricator into a multi-faceted advanced center for technology development and product commercialization. From its ample manufacturing space in Rochester, NY, PEKO offers a full suite of services that completely support

innovation | preparation | replication

OEMs with all aspects of their new machinery, equipment, and technology innovations, from engineering and manufacturing development to full-rate production. PEKO has worked with many companies from across an array of industries, including industrial, defense, semiconductor, medical, life sciences, communications, renewable energy, robotics, material handling, electrical, and more.
