

**FOR IMMEDIATE RELEASE**

## **PEKO Announces New Interactive 3D Virtual Facility Tour**

ROCHESTER, NY (June 23, 2021) – PEKO Precision Products is excited to introduce a new, interactive virtual tour of its state-of-the-art manufacturing campus in Rochester, NY. In this first phase of PEKO’s virtual tour initiative, you will get to see 60,000 sq ft. out of PEKO’s total 350,000 sq ft. of manufacturing space.

This phase of the virtual tour includes three of our key facilities, including the:

1. **Large Boring & Gantry Machining Rooms:** PEKO’s large machining area is where precision structures, assemblies, and large CNC machined parts are made. The clean and controlled environment in these machining rooms enable complex parts to be manufactured with incredible precision. PEKO’s precision large machining rooms comprise of 25,000 sq ft.
2. **North & South Assembly Rooms:** PEKO’s assembly areas are where precision defense assembly and top-level machinery and equipment assembly take place. Here, PEKO creates individual manufacturing cells for each customer, utilizing optimal assembly techniques and lean methodology practices. These two assembly rooms comprise a total of 35,000 sq ft.

PEKO’s virtual tour features a user-friendly interface similar to Google Earth with a 360-degree view, providing a great opportunity for prospective customers to see inside PEKO’s advanced center for technology development and product commercialization right from home on their computer screen.

This new virtual tour option can be advantageous to your project because it allows the user to review a Contract Manufacturers qualification and evaluate if the manufacturing environment is organized, orderly, clean, safe, and up to your standards, without the need for an in-person facility tour.

“In preparation for a new business travel landscape, PEKO is bringing our in-person tour right to the customer with our innovative virtual tour experience” says Scott Baxter, Manager of Business Development and Marketing. In the future, PEKO will be expanding upon this initiative to include its entire 8-building campus. This will allow customers to make more timely and informed decisions when deciding to outsource to a contract manufacturer and determining who your ideal partner is.

For exclusive access to our new virtual tour, visit [offers.pekoprecision.com/virtual-tour-signup](https://offers.pekoprecision.com/virtual-tour-signup). To watch our complementary HYPE video, visit <https://youtu.be/UVTK7yIS1s4>.

**About PEKO Precision Products (PEKO):** PEKO is a vertically integrated contract manufacturing partner of machinery, equipment, and devices, specialized in the commercialization of complex electro-mechanical systems and new innovative technology solutions. For over 50 years, PEKO has been providing a range of crucial manufacturing services to its customers. From its 350,000 sq ft. manufacturing campus in Rochester, NY, PEKO supports every stage in bringing new technology to
