

PEKO RECOGNIZED IN THE 10 BEST INDUSTRIAL MACHINERY COMPANIES TO WATCH IN 2022

ROCHESTER, NY (December 23, 2022) – PEKO Precision Products was recognized as one of the best industrial machinery companies to watch in the November 2022 issue of [Insights Success Magazine](#), a publication that aims to be a thorough guide to all the diverse challenges of business. This acknowledgment reflects PEKO's continued commitment to helping OEMs develop and manufacture modern machines and equipment that enable innovation and promote a better world.

PEKO participates in a full range of manufacturing aspects. The company's [New Product Introduction \(NPI\)](#) division specializes in commercializing early lifecycle machinery and equipment. Once the machine is commercialized, PEKO has a [production division](#) that has performed serial builds for many years. These two robust offerings combine to bring PEKO's [machinery commercialization](#) process to the forefront of contract manufacturing.

"We've worked with thousands of different machines across hundreds of industry segments," said Scott Baxter, Sales & Business Development Manager. "Our manufacturing teams are skilled in PLC controls, electrical, cabling, frame fabrication, component manufacturing, motion control, and all other facets of machinery development and manufacturing."

Being named one of the 10 Best Industrial Machinery Companies to Watch of 2022 supports PEKO's vision to be the premier contract machinery and equipment builder for industry-leading OEMs. An [in-depth article on the nomination](#) can be found in the November issue of Insights Success magazine.

About PEKO Precision Products (PEKO):

PEKO is a leading contract manufacturer providing turnkey manufacturing solutions for machinery, equipment, and major electromechanical assemblies. PEKO's capabilities span the entire product lifecycle, including engineering, development, machining, sheet metal fabrication, electrical integration, assembly, and full-scale production. PEKO supports startups and early-stage projects through its New Product Introduction (NPI) division, a dedicated space that adapts to the needs of early-stage manufacturing and supports low-volume builds that are still in the design phase, including alpha/beta builds and pre-production pilot builds.
