

Using the Terminal

If you are comfortable with using the Terminal / Bash, this is another option. From the terminal, you can use the command “unzip” to unzip any zip file.

```
michaelb@swiftx:~$ cd Downloads/
michaelb@swiftx:~/Downloads$ ls
1.1-html.54cc718.zip
michaelb@swiftx:~/Downloads$ unzip 1.1-html.54cc718.zip
Archive:  1.1-html.54cc718.zip
